

Only Ten Times

(Crystal Meth)

If you take me one time, you'll feel a sensation
You'll want to take me again, it'll be a temptation
If you take me two times, your world will go hazy
I'm crystal meth, trust me, I'll make you go crazy
If you take me three times, now you can't resist
Your friends and family won't seem to exist
If you take me four times, you'll want to use me forever
And then your whole life, we'll be together
If you take me five times, you'll be craving me all the time
Now, you won't know you're committing a crime
If you take me six times, you'll be out of your mind
You'll murder your friends when crystal meth you can't find
If you take me seven times, I'll ruin your life
I'll make you beat your children and your wife
If you take me eight times, I'll always rule over you
Now you know the consequences, you know what I do
If you take me nine times, you've gambled your life away
And you still don't regret ignoring the things I had to say
If you take me ten times, you're in the back alley and you're dead
Don't say I didn't warn you, you heard all that I said.
